this book more than anything else is a history in short of two transportation systems about america in the past 150 years how one was built by private money the robber barons who produced a national infrastructure that has lasted to this day about how these people through their generosity made hospitals schools libraries the other is the one made by the government interstates airports this system has been around since the mid sixties

today is falling apart due to lack of government funding this book shows how local politics controls where the money is going and how i hope the reader will find this informative

this book investigates the danish philosopher soren kierkegaard s 1813-1855 contributions to our understanding of psychology in kierkegaard s historical context psychology was challenged from both scientific and philosophical perspectives kierkegaard considered psychology a core discipline central to his understanding of metaphysics as well as theology the first part examines kierkegaard and experimental psychology focusing on kierkegaard s work explicitly referring to psychology the second part considers psychology in terms of the german enlightenment including kant s rejection of psychology as a science the third part discusses how to understand kierkegaard s psychology today calling attention to his continuing impact on modern psychology and modern science kierkegaard s conception of psychology remains relevant for any discussion of the role of today s psychology in tracing psychology s evolution after kant and kierkegaard the author finds the discipline has followed two main paths the dominant path follows kant s ideals about science while the other much narrower trail has its origin in kierkegaard

we are now living through a period of knowledge capitalism in which as castells put it the action of knowledge upon knowledge is the main source of productivity in the face of such transformation the economic social and institutional contours of contemporary capitalism are being reshaped at the heart of this world are an emergent set of economies regions institutions and peoples central of the flows and translations of knowledge this book provides an interdisciplinary review of the triad of knowledge space economy on entering the twenty first century drawing on a variety of disciplinary backgrounds the first part of the book comprises a set of statements by leading authors on the role of knowledge in capitalism thereafter the remaining two parts of the book explore the landscape of knowledge capitalism through a series of analyses of knowledge in action within a range of economic political and cultural contexts bringing together a set of authors from across the social sciences this book provides both a major theoretical statement on understanding the economic world and an empirical exemplification of the power of knowledge in shaping the spaces and places of today s society
